

Fabric and Colour Options

Our Fabric

We use TPU (thermoplastic polyurethane) fabric for its strength and light weight.

Each part of your packraft has a different weight of fabric, depending on the requirements for weight and strength.

TPU is very resistant to UV and abrasion, and is very strong, making it the perfect fabric for packrafts.

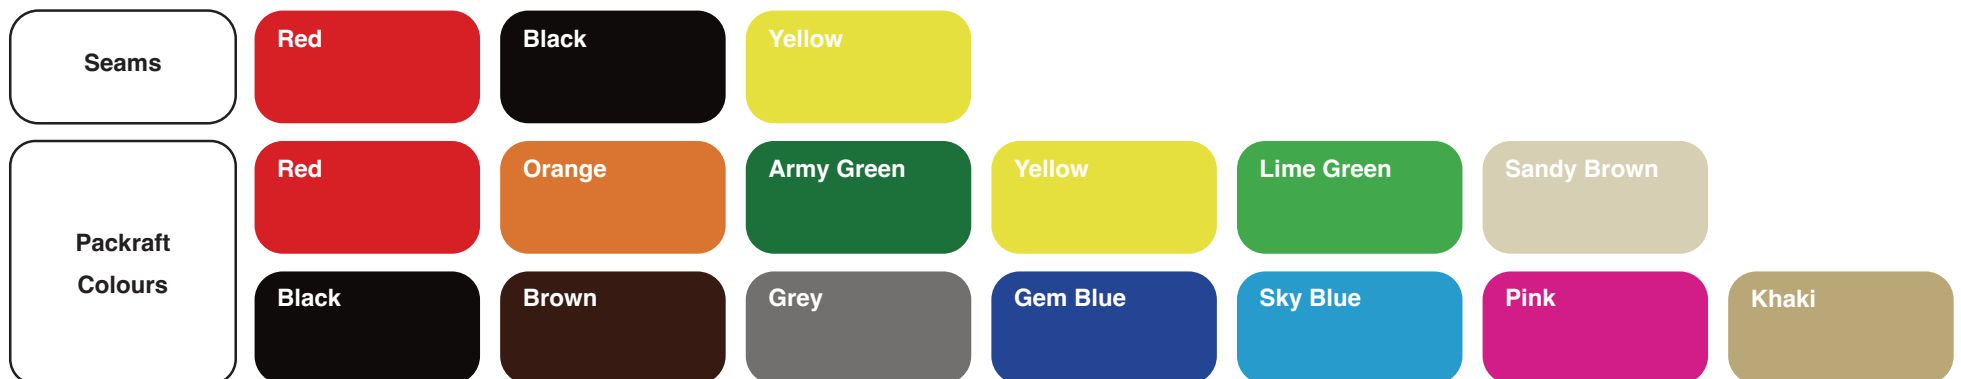

TPU can be welded, making very strong seams in your packraft.

Colours

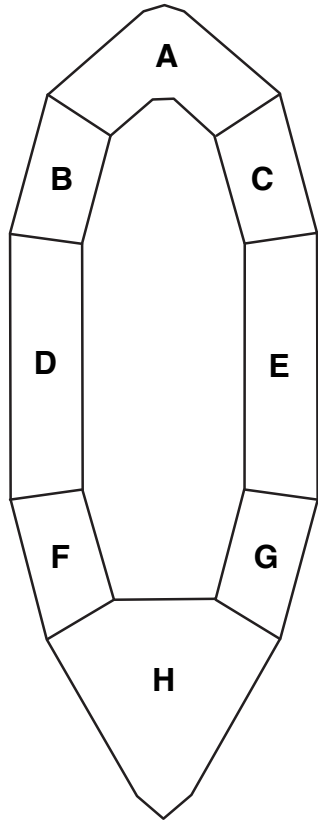

We will custom-make your packraft with your chosen colours.

Use the chart on the next page to specify your colours, and send it to us before we order your new packraft.

There is NO ADDITIONAL COST to customise the colours of your packraft.
